DESCRIPTORS: *Liquids, *Viscosity, *Molecular
structure, Theory, *Fluid flow.

A theory of viscosity is derived based upon data on the
molecular structure of liquids. The interaction is
analyzed between molecular groups, when a liquid is
composed of single atoms or molecules. The viscous
flow of liquids is treated as resulting from a succes-
sive series of elemental processes, amounting to a dis-
(Chemistry--Physical, TT, v. 6, no. 9) (over)
